

Bringing a  
bigger buzz  
to **play**

We create innovative,  
quality play environments  
designed to get children of  
all ages and abilities outside  
to have fun, be active and  
live healthy lives.

And we've been doing it  
for more than 20 years.

## Dedicated to play and building a healthier Australia

Our equipment is designed with the input of experienced physical educators and exercise physiologists, and manufactured to exacting quality standards. Safety is of course paramount and all of our products meet the required Australian Standards.

From the early stages of building toddlers imaginations to developing play skills and fitness for growing children, right through to providing broadly accessible exercise facilities to keep communities active and healthy, we create environments that deliver a broad range of benefits.

## Experience spanning more than 10,000 projects

We've installed playgrounds and outdoor gyms in just about every corner of Australia. We work with local councils, schools, childcare centres, community groups, sporting clubs and hospitality venues amongst others.

Experience counts and with more than 10,000 projects completed, you can take comfort that we are well placed to meet your needs. Our experience supported by our capabilities has seen us endorsed and approved by numerous peak bodies and procurement groups including:

a space to play

# a\_space's extensive range of playground equipment has been developed to suit just about any application, space and budget.

With an almost infinite array of configurations available our experienced playground design consultants take pleasure in understanding

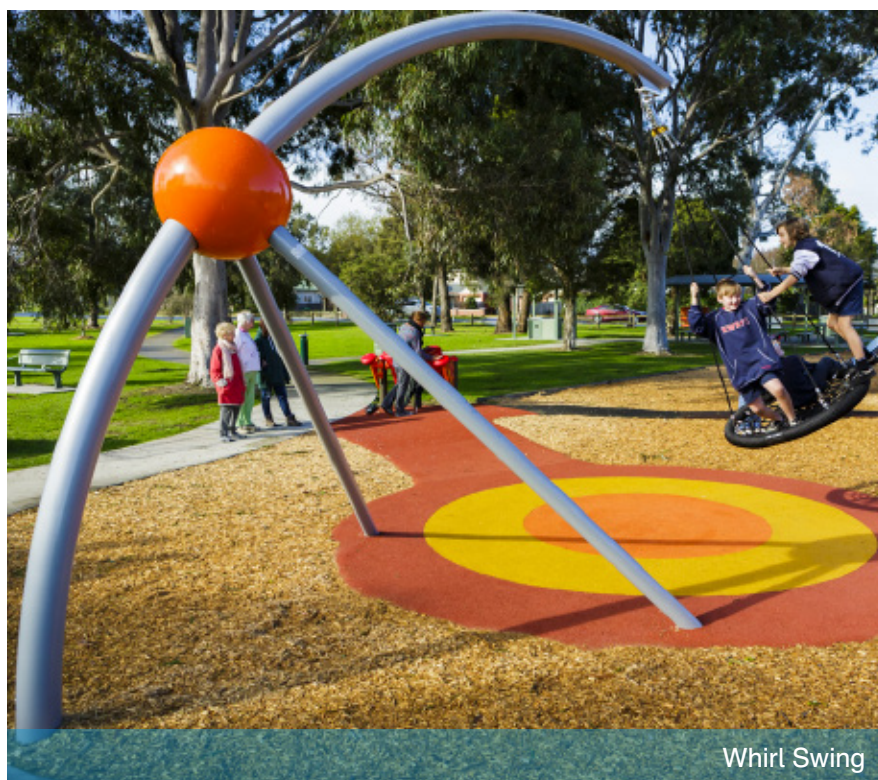

the needs of each unique customer to create designs that excite and inspire.

# A buzz that always starts with quality, safety and service.

Our team offers decades of industry experience. As a result we truly understand the needs of our customers and are dedicated to meeting them.

## Quality certified

a\_space maintains quality certification to International Standard ISO9001. Our approach to quality permeates every part of our business from our first interaction with customers to the completion of each project.

## Compliance and safety without compromise

Our equipment and installations are designed to comply with the applicable Australian Standards. These include:

- AS 4685:2014
- AS/NZS 4486.1
- AS/NZS 4422

# a\_space to grow

Environmentally responsible behavior is an essential part of how we do things, and we recognize that this contributes significantly to our long-term company success.

## **Sustainability is just part of what we do**

We are constantly shaping our processes and working with our suppliers to explore materials that are kindest to the environment while meeting durability needs. Our products are developed to deliver a long service life which is a key to sustainability.

## **Made in Australia for Australian conditions**

From the harsh coastal environment to the dusty outback and from scorching sun to flooding rains, a\_space equipment is built to last for years. We stand by this promise with our comprehensive warranty and proven after sales service.

# Complete project delivery

We're focused on making your complete project a success.

We offer a complete project solution including installation, a range of undersurfacing options, shade structures and landscaping.

Our experienced project management team manage all elements ensuring you are kept informed and that all work undertaken complies with strict work health and safety requirements.
