

Spire Towers

Play at every level!

Global design thinking
born in Australia

Developing the Spire
Towers range, we
benchmarked the best
in the world, with a focus
to do even better.

Combining a high quality, refined
aesthetic with innovative play value
at every turn, Spire Towers have been
designed to delight children of all ages
while making open space planners
look great!

What we mean by 'Play at every level'

Internal Climbers

Internal climbers create different paths, interest, and challenge all the way to the top.

Climbing Challenges

Multiple climbing access points challenge users' physical strength and develop motor skills.

Rubber Hammock

Low-level accessible hangout zones that promote balance, co-ordination and socialisation.

Spaghetti Maze

Internal obstacles that have users zig-zagging their way through this tactile rope course.

Talk Tubes

Talk tubes are hidden throughout different levels for communication & social connectivity.

Vantage Points

Central peaks in each tower for kids to explore their surroundings.

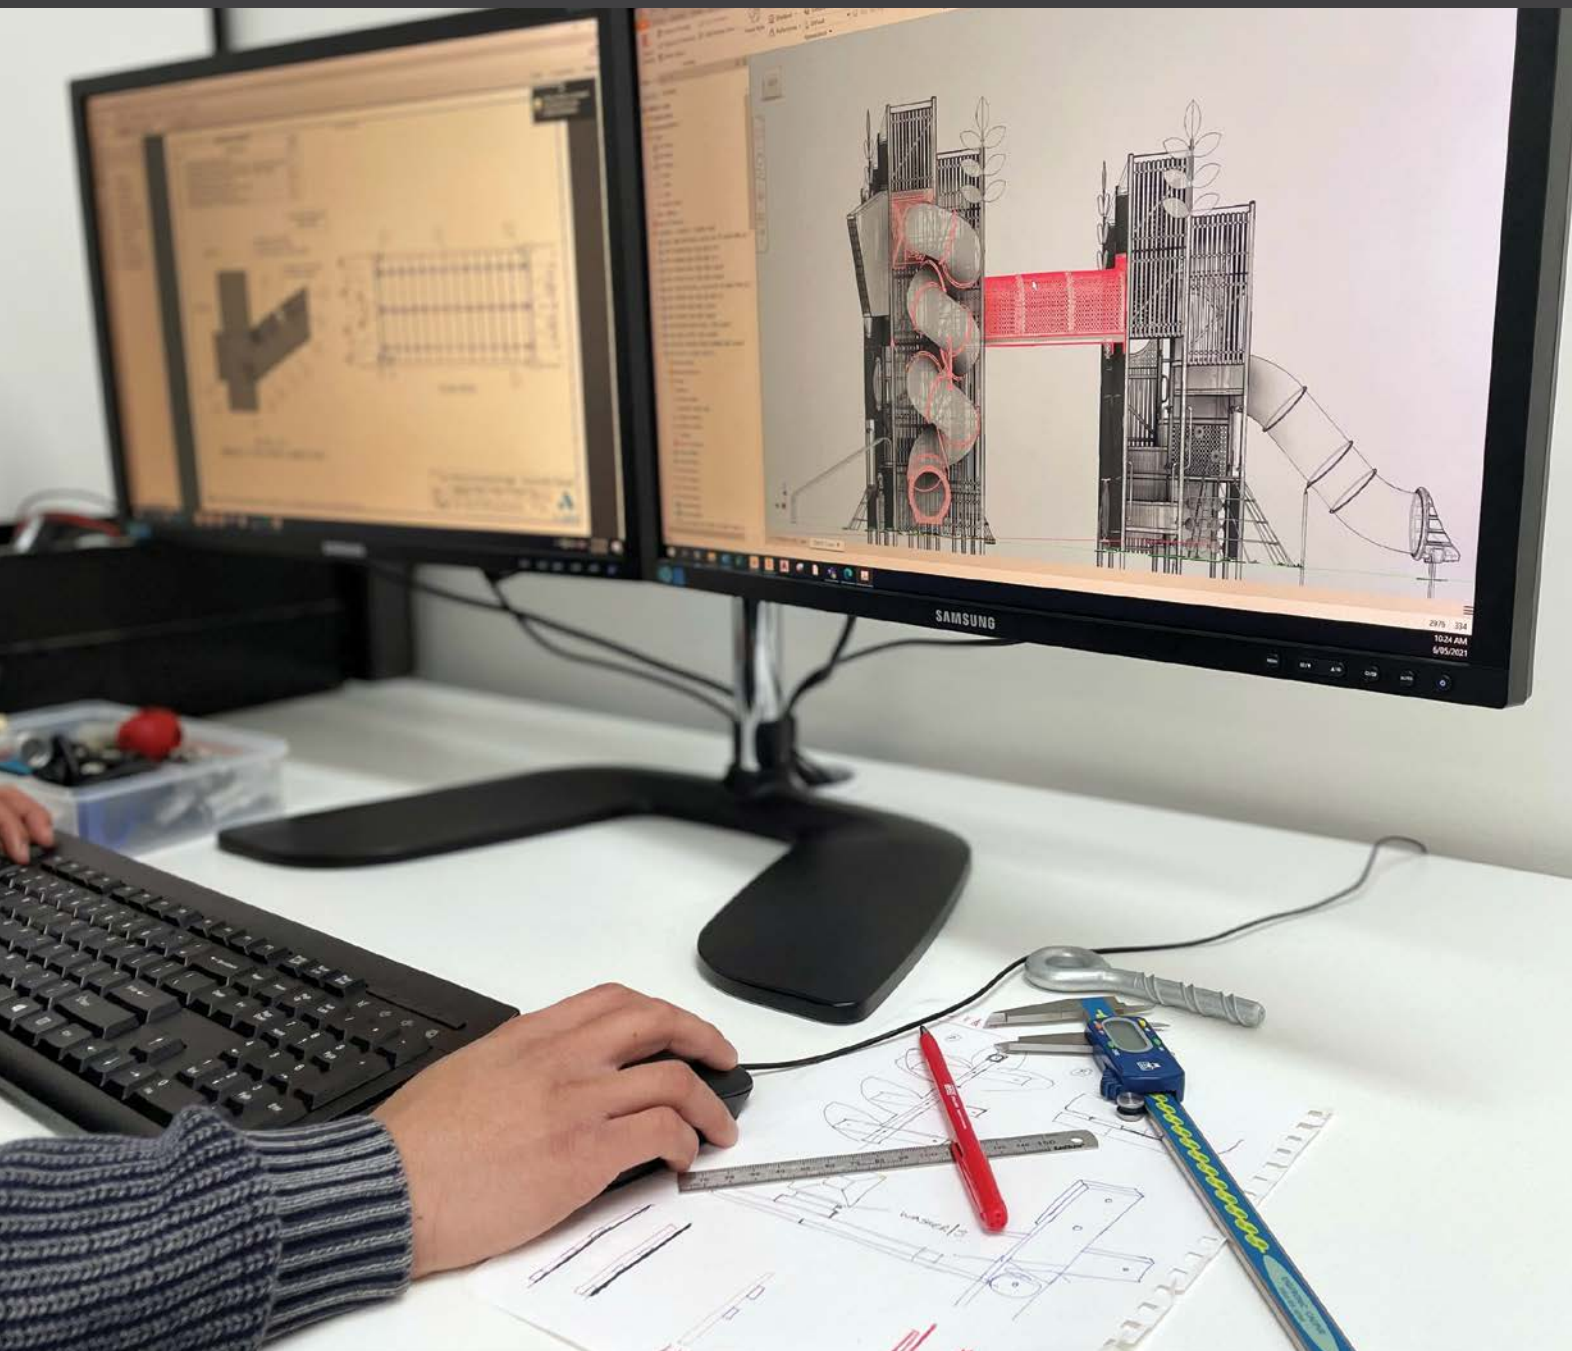

We've considered and catered for children of all ages and abilities. Spire Towers offer fun and innovative play activities from the ground to the top level.

Multiple user paths offer different levels of challenge and hours of fun. Climbing nets, rock walls, ladders, tunnels, play panels and hammocks are just some of the activities offered at ground level. Transition ramps, rope elevators, spaghetti mazes and talk tubes are more of the activities provided on the way up. And of course, there's an array of spectacular slides to whizz down!

Independently engineered using sustainable quality materials

Spire Towers are designed and engineered for Australian conditions catering for our wide ranging climate, from searing sun to gale force winds and flooding rains. Materials include quality steel uprights, aluminium platforms, panels and roofs and Australian hard woods.

Designed for serviceability

Unlike bespoke towers, Spire Towers have been developed with ready access to replacement parts so in the event that an item is damaged or wears out, your tower can be kept in operation with minimal disruption.

Fixing Method
Internal tamper proof fixings allow maintenance to be carried out without the use of cranes or scaffolding.

How to create your dream Spire Tower

1

Select a Theme

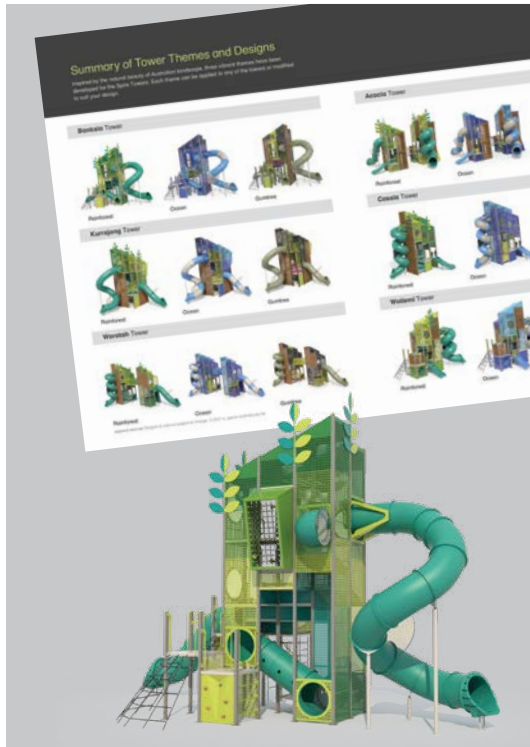

We've created three themes that reflect our Australian landscape.

2

Select a Tower Type

Our collection of thoughtfully considered Tower Types are designed to meet different sized spaces and budgets.

3

Design Refinement

We'll work with you to refine other aspects of your play project including separate play items, undersurfacing and landscaping options. We'll then prepare a customised design and quote.

4

Manufacture & Installation

Once confirmed we'll prepare a detailed project plan, manufacture to your requirements and undertake the installation and associated works overseen by one of our experienced Project Managers.

5

Lifetime Support

Importantly, we're around for the life of your playground. Our maintenance division has ready access to spare parts from our Australian manufacturing facility available with fast turn around.

Spire Tower Themes

Coinciding with our uniquely Australian design aesthetic.

We have developed three themes based on aspects of our local environment. Each theme provides a contemporary perspective and can be applied to any of our Tower Types.

Ocean

The cool blue splash of the Ocean has inspired this theme. It's designed to enhance and blend into Australian coastal environments.

Rainforest

Taking its cues from the rich, lush foliage of Australian rainforests and inland waterways, this palette offers a relaxing, tonal balance with different shades of greens that can be enhanced with warm natural timber.

Gumtree

The flowering gums' stunning pink flowers and brilliantly contrasting greens have inspired a modern colour scheme that speaks of the vibrant Australian bushlands, while appealing to a striking architectural aesthetic.

Spire Towers Range

Wollemi Tower

At 5.7m tall, the Wollemi Tower has been designed to encourage children of all age groups to play together with different types of challenge and delight at each level. Robust climbers, low events, slides, tunnels and moments of surprise offering discovery will excite and inspire.

 Height 5.7m	 Age Group 2 - 12
 User Paths 10	 Area Required 8.6 x 10.8

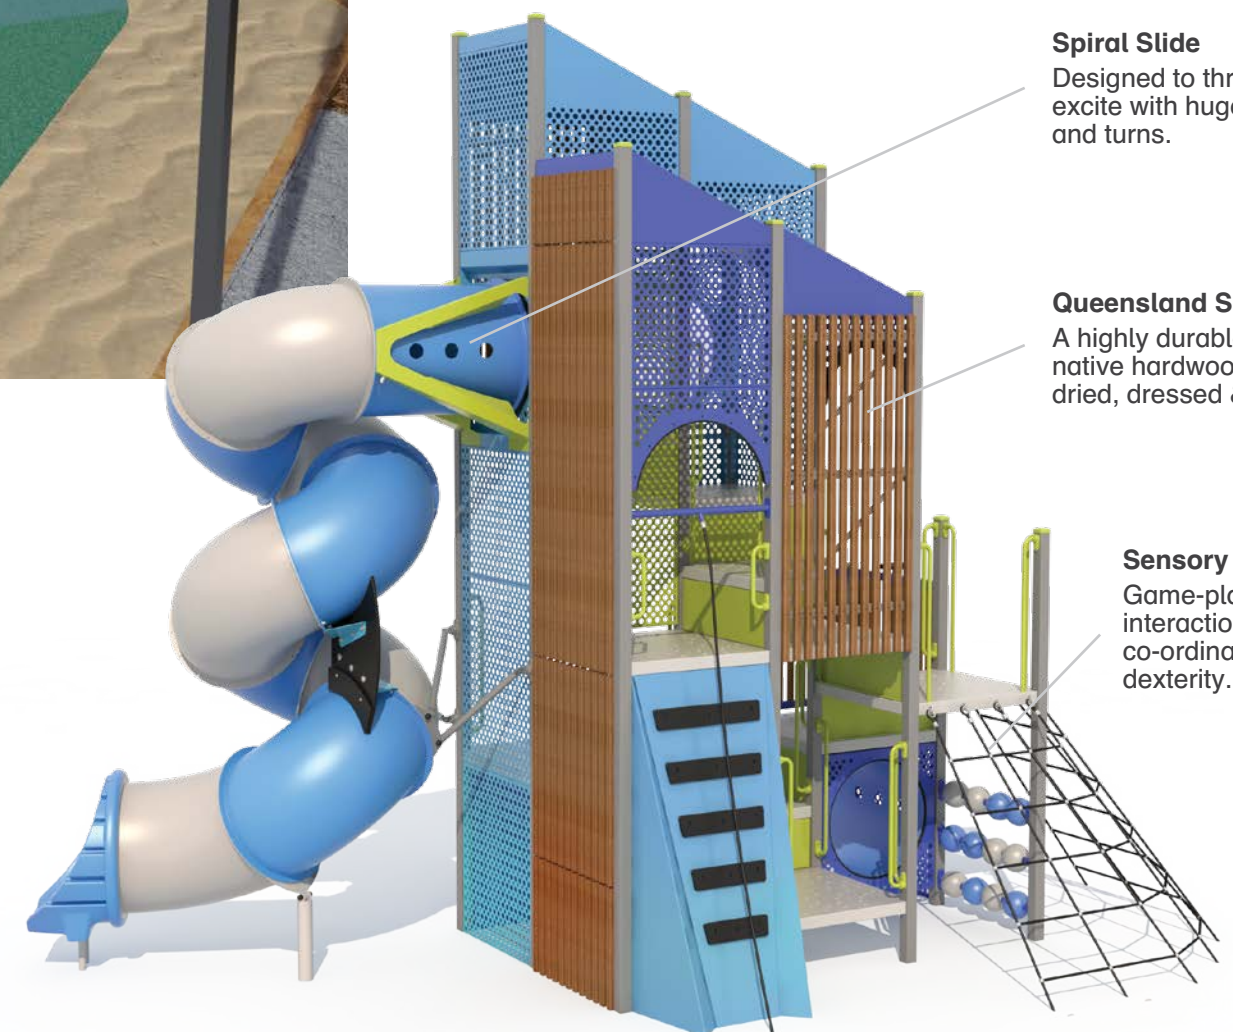

Aluminium Roofs
Aluminium plate with architectural forms cast shade and protect users.

Scaling Wall
With a 2m high inclined wall, climbers use rope and footholds to scale to the top platform.

Spiral Slide
Designed to thrill and excite with huge twists and turns.

Queensland Spotted Gum
A highly durable, premium native hardwood that's kiln dried, dressed & oiled.

Sensory Panels
Game-play, social interaction, hand-eye co-ordination, and dexterity.

Cassia Tower

Designed to maximise play value in compact areas, this tall, narrow tower is packed with multilevel fun. With low a low level slide, rock walls and climbers that graduate to the more challenging rope elevator and huge spiral slide on the top level, the Cassia Tower will enhance any community space.

 Height 6.9m	 Age Group 2 - 12
 User Paths 12	 Area Required 10.3 x 10.4

Aluminium Cladding Panels
Internal fixings allow maintenance to be carried out without the use of cranes or scaffolding.

Rock Wall
A contoured face emulates the more complex challenges of scaling a real rock face.

Bubble Windows
Viewing ports that allow light and visibility into the tower.

Junior Slides
Sliding opportunities for younger users to play side by side with bigger kids.

Spiral Slide
Designed to thrill and excite with huge twists and turns.

Easy Access
Easy access user paths for adult carers to navigate if need be.

Acacia Tower

This tower has graduating opportunities for fun and challenge. With a focus on imaginative, sensory and social play, the junior slides and low level sensory panels appeal to younger kids. More complex climbing opportunities and impressive twisting slides encourages bigger kids to develop their capabilities and confidence.

	Height 5.7m		Age Group 2 - 12
	User Paths 18		Area Required 12.9 x 13.6

Cascade net
Scale the rope nets to develop strength and motor skills.

Spiral Slide
Designed to thrill and excite with huge twists and turns all the way.

Gumleaf Features
Thematic leaf elements bring this space to life, igniting the imagination.

Junior Slides
Sliding opportunities for younger users to play side by side with bigger kids.

Secret Passages
Discovery and delight through hidden pathways and tunnels.

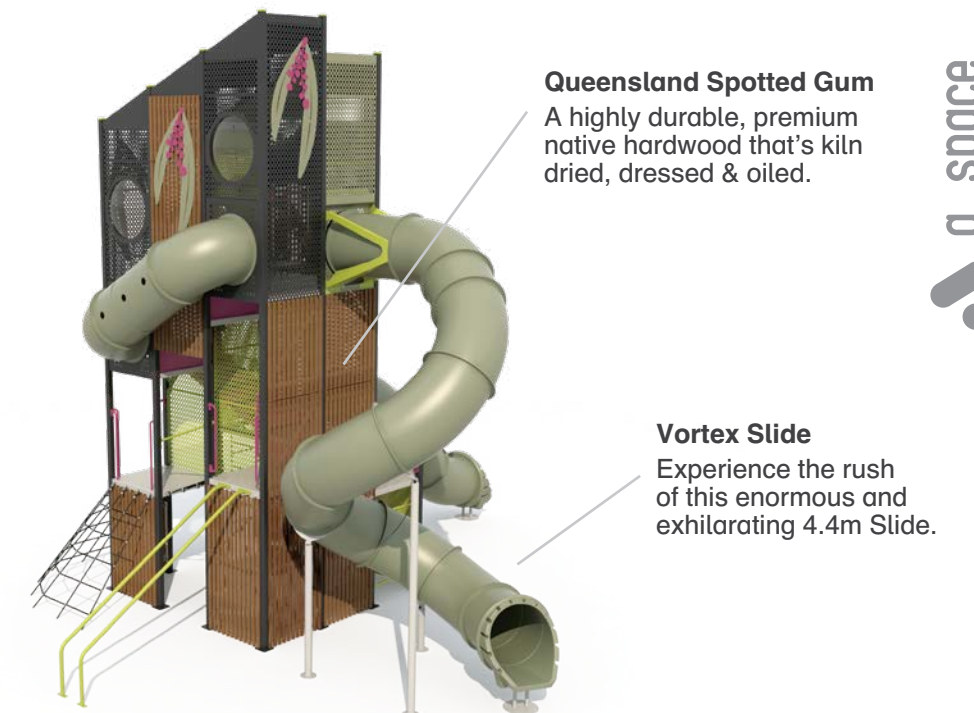

Rock Wall
A contoured face emulates the more complex challenges of scaling a real rock face.

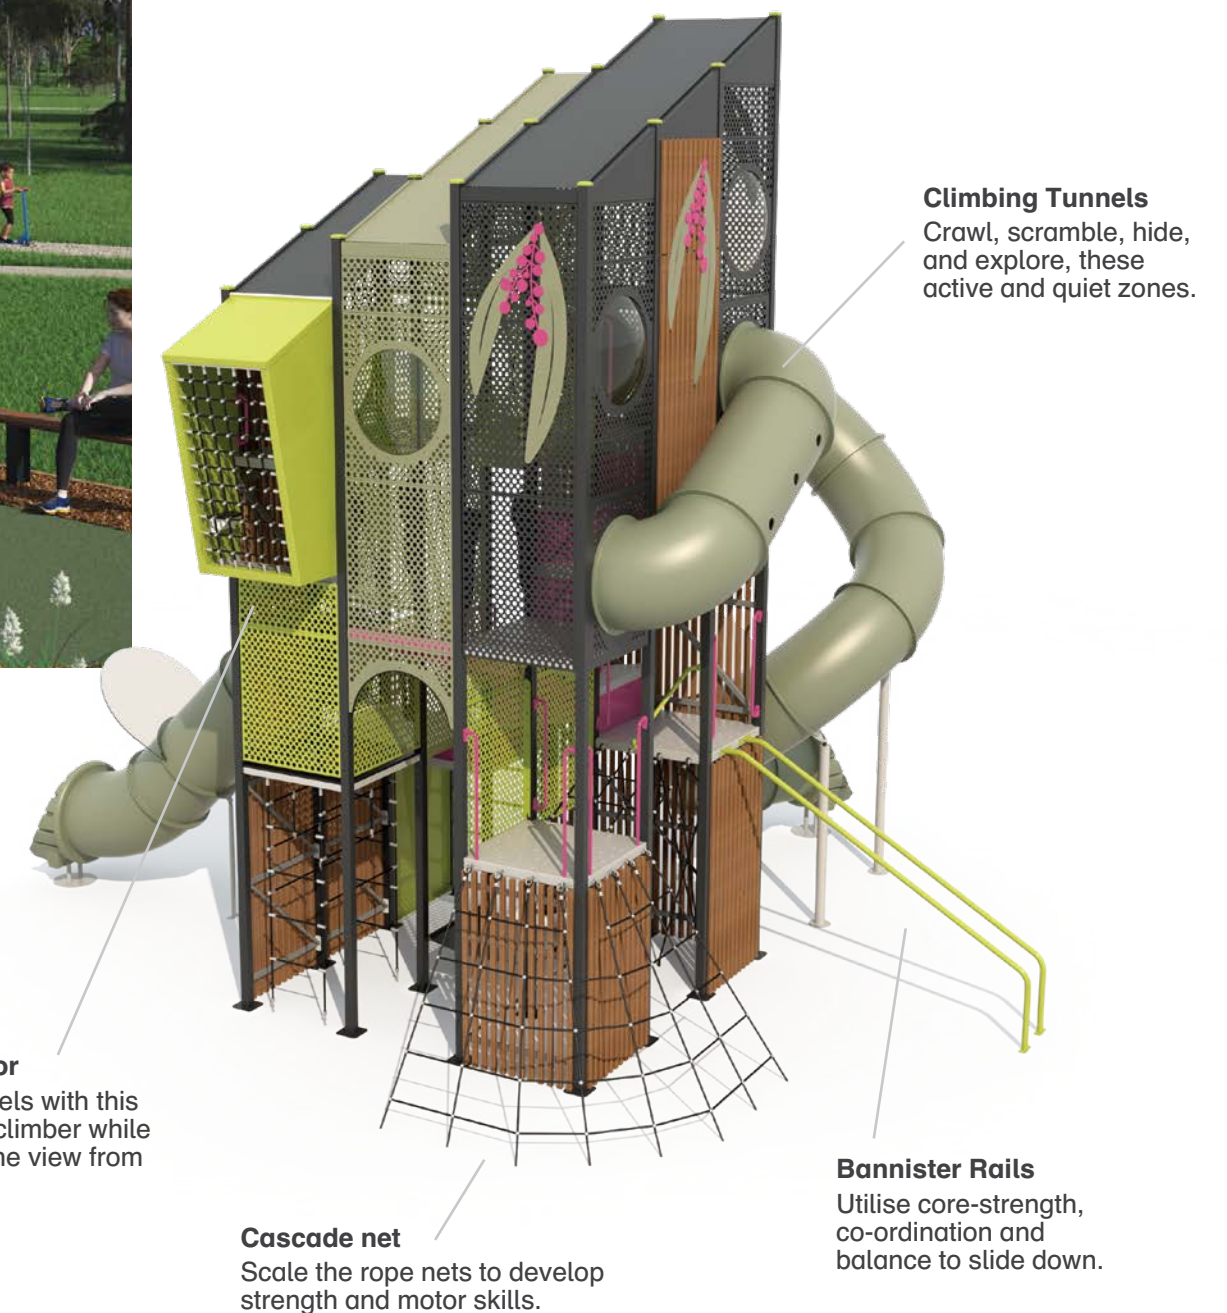

Kurrajong Tower

This enormous play tower is overflowing with play value. With over 7 different types of climbers from the ground up, a massive vortex slide, internal mazes and rope climbers kids will find endless opportunities to have fun, challenge themselves and develop new skills. This tower offers an abundance of opportunities to explore and interact bringing out children's playful curiosity.

	Height 7.7m		Age Group 5 - 12
	User Paths 18		Area Required 11.9 x 13.1

a_space

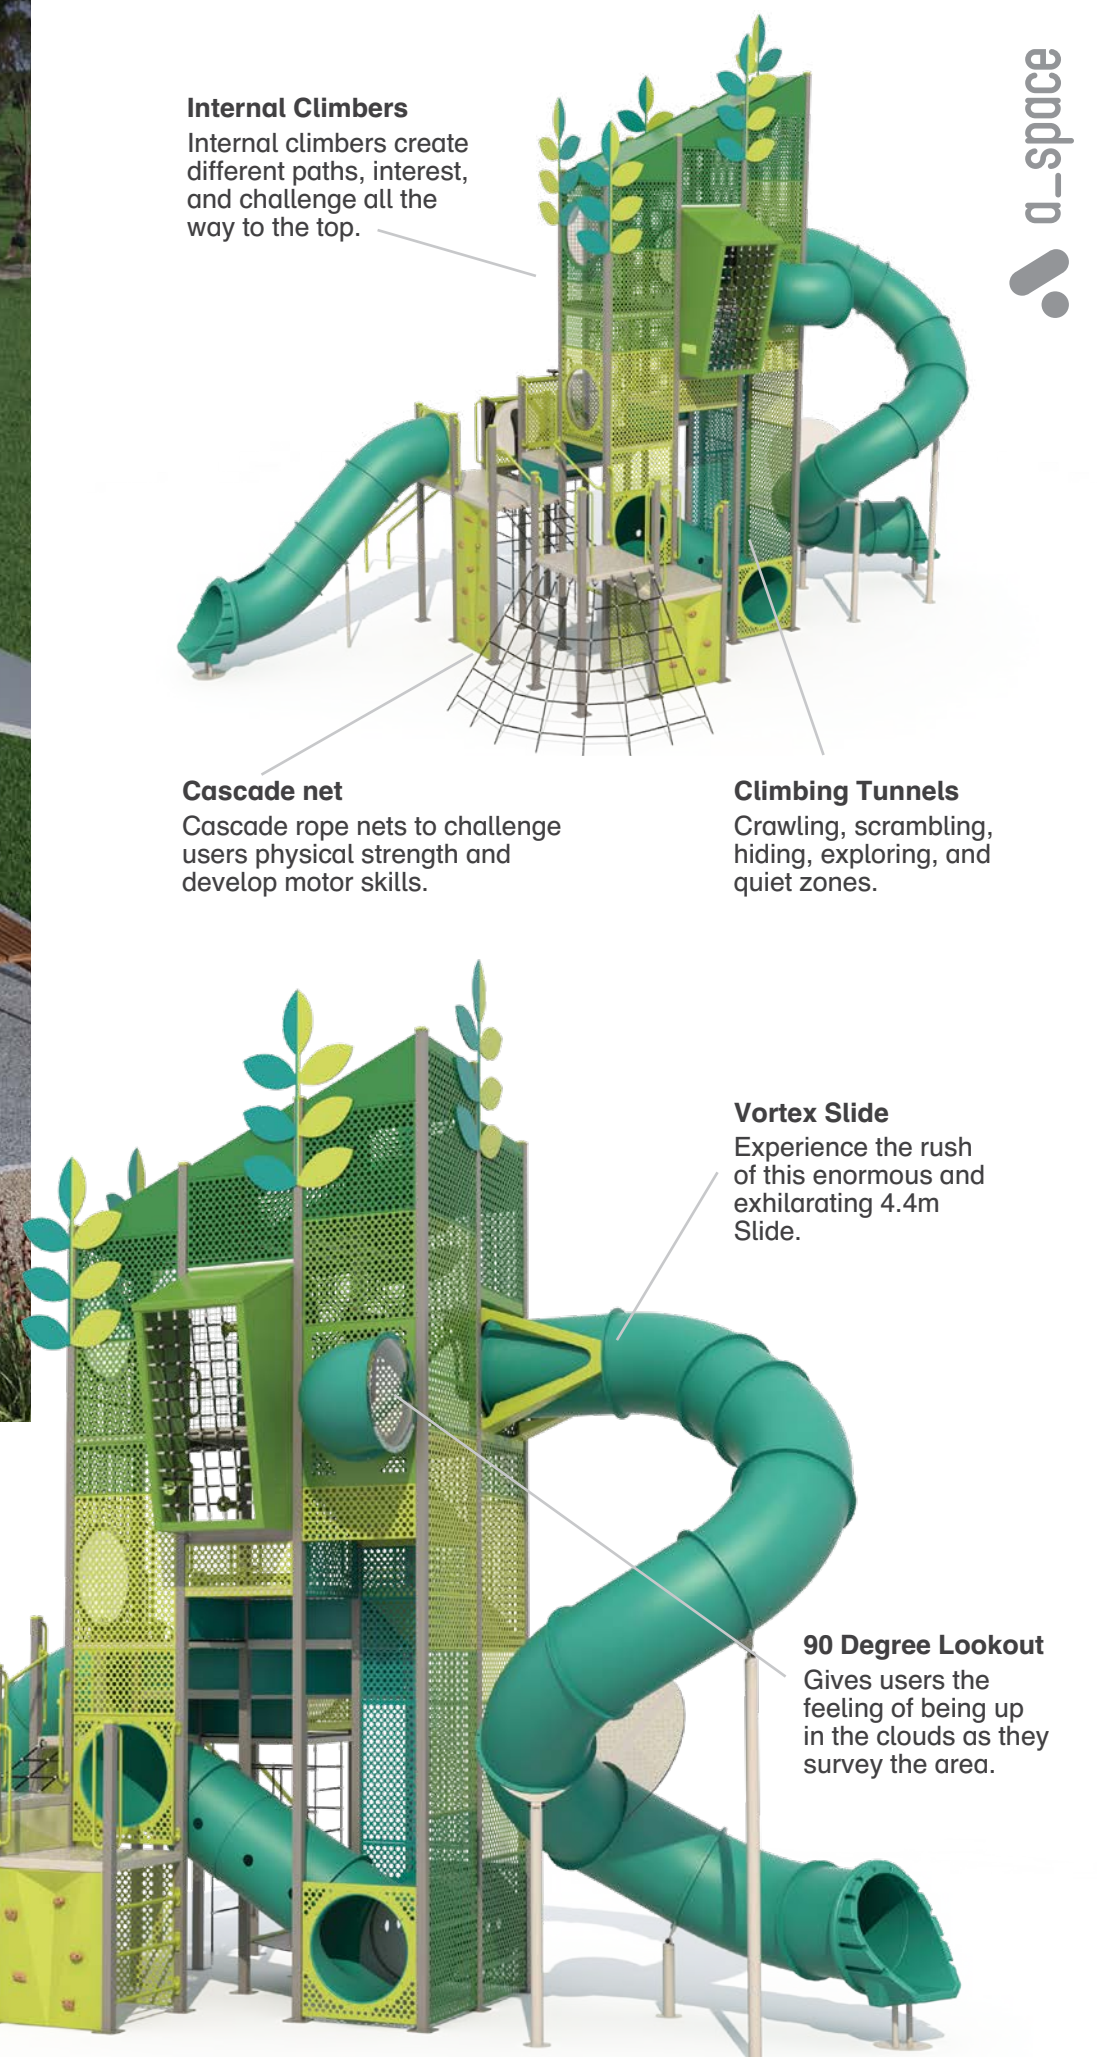

Banksia Tower

This giant tower and vortex slide sitting at over 8m tall will create a stunning visual impact, sure to excite the community and inspire the imagination of young and old. From the climbing ropes, side elevator and bannister rails there is a huge amount of play value packed into every level, down to the hammocks and crawling tunnels. Loads of fun to be had by kids of all abilities.

 Height 8.1m	 Age Group 2 - 12
 User Paths 18	 Area Required 11.4 x 15.6

Waratah Tower

Connected by a 3m Highline Rope Bridge, this mega tower has multiple routes and climbing pathways kids can explore that will challenge and thrill. Low level sensory elements are hidden throughout for kids to discover, such as talk tubes, bead panels and secret passages.

	Height 6.9m		Age Group 2 - 12
	User Paths 22		Area Required 9.4 x 16.7

Sensory Activities
Promote game-play, social interaction, hand-eye co-ordination, and dexterity.

Queensland Spotted Gum
A highly durable, premium native hardwood which is kiln dried, dressed & oiled.

Highline Rope Bridge
Users rise to the challenge, developing confidence as they navigate the highline ropes.

Scaling Wall
With a 2m high inclined wall, climbers use rope and footholds to scale to the top.

Quiet Spaces
Zones for kids to retreat and enjoy solitary play, or a moment of respite.

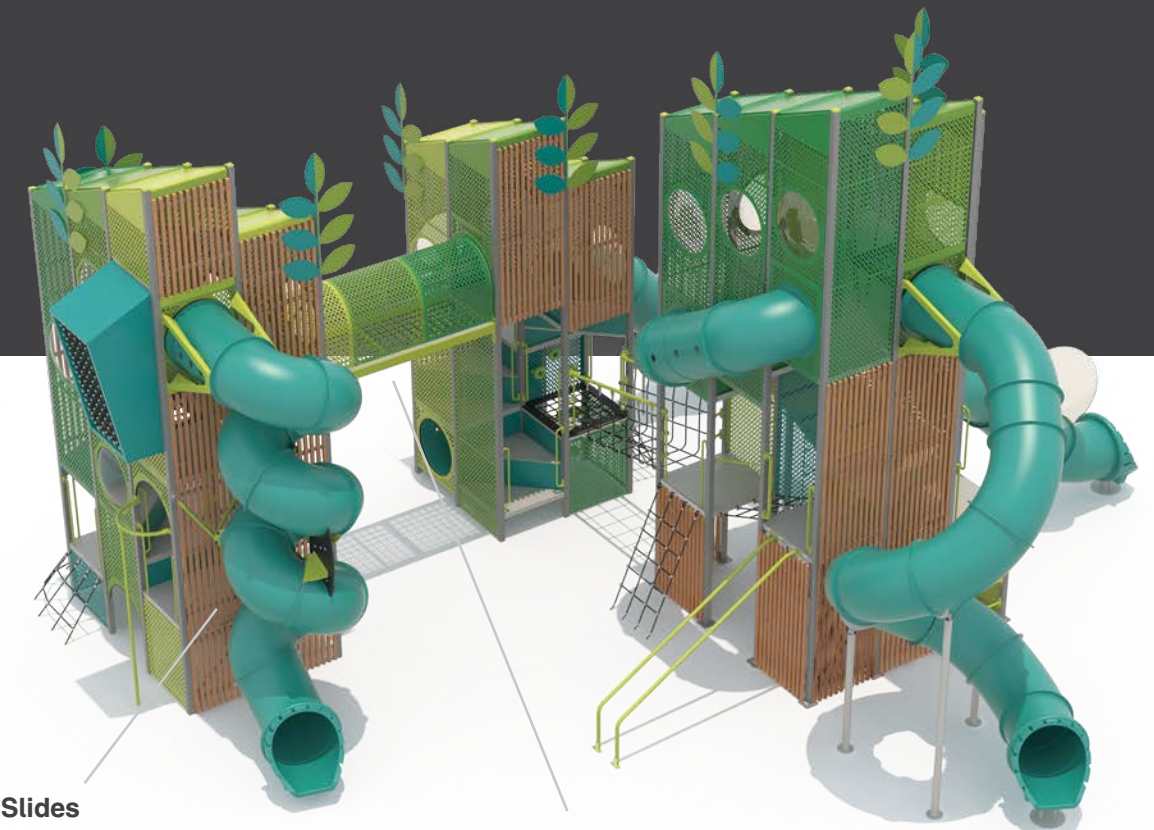

Spire Towers can be joined
for a massive play experience!

Create an unforgettable play experience by joining
Spire Towers to take your playspace to the next level.

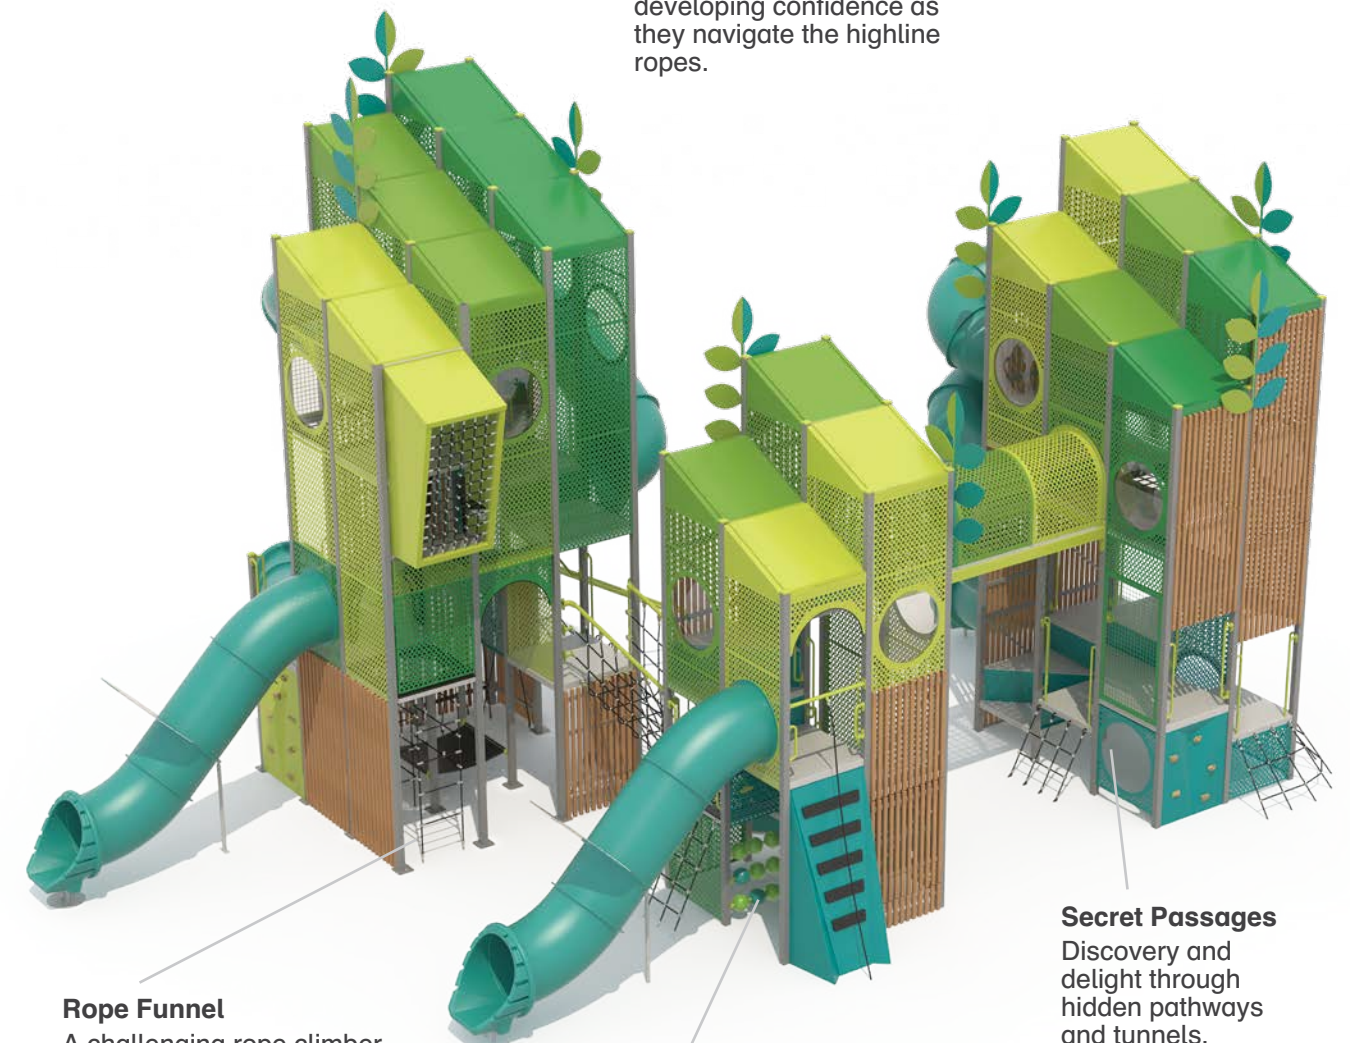

With endless possibilities, the modular design system allows exciting combinations that
our design team can create to suit your vision.

These mega tower designs cut a striking silhouette, designed for maximum impact and
packed to the brim with opportunities for both active and quiet play. A fully immersive
world of play in which children can lose themselves and live out their own big adventures.

Spiral Slides
Designed to thrill and excite
with huge twists and turns.

Highline Rope Bridge
Users rise to the challenge,
developing confidence as
they navigate the highline
ropes.

Rope Funnel
A challenging rope climber
that provides access into the
tower from ground level.

Sensory Activities
Game-play, social
interaction, hand-eye co-
ordination, and dexterity.

Secret Passages
Discovery and
delight through
hidden pathways
and tunnels.

Summary of Tower Themes and Designs

Inspired by the natural beauty of the Australian landscape, three vibrant themes have been developed for the Spire Towers. Each theme can be applied to any of the towers.
