communities**

Australia's favourite outdoor fitness equipment

For more than 10 years a_space has been creating outdoor fitness equipment to help enable people of all ages and fitness levels to achieve greater well being.

- More than 1000 outdoor gyms in operation
- Proudly designed and manufactured in Australia
- Compliant to AS16630
- Quality certified ISO9001
- Building healthier communities

It's no secret that physical activity levels in Australia have been declining for years. With our ageing population there's a growing need for solutions that enable people to spend more time outdoors and undertake more physical activity.

a_space is passionate about building healthier communities and leads the outdoor fitness equipment category in Australia. We've worked with peak bodies in the development of guidelines for the design

and implementation of outdoor fitness equipment and played an important role in the introduction of Australian Standards to ensure the safe design and implementation of outdoor gyms.

We're proud to produce all of our equipment in Australia at our sophisticated production facility.

Thank you for considering a_space for your project.

The confidence of experience

Creating the right outdoor fitness facility to meet the needs of each location

Each location has unique attributes. Differences may include the demographics of intended users, their fitness levels, the space available or budget. We work with our customers to understand their needs and design spaces and configurations specifically to suit.

Engineered and built to last in any environment

Understanding the robust treatment of equipment in open space, all a_space outdoor fitness equipment is designed, engineered and manufactured to be fit for purpose. We have developed and provide a Marine Grade specification for harsh coastal locations.

Built to last with uncompromising safety

All a_space equipment is designed to be compliant with the Australian Outdoor Fitness Equipment Safety Standard AS16630.

Designed for users to love!

We collaborate with exercise physiologists to ensure the design of a_space equipment is ergonomically sound and fit for purpose. Each item of equipment is supported with simple to follow instructional signage containing QR codes linking to video demonstrations.

The Range

The a_space outdoor fitness equipment range includes items **suited to a broad range of users**, from those starting their fitness journey to elite athletes, practicing calisthenics (also known as street workout).

The range incorporates equipment designed to build cardio fitness, strength and mobility.

The following pages provide a selection of pre-designed configurations for different applications supported by information about each individual item of equipment in our range.

Equipment Details

Here's details of each item of equipment that can be selected and combined to create a tailored solution.

We offer two ranges, **Fit for Parks** and **Fitness Extra**. These ranges are designed to be brought together to create spaces appealing to different user profiles.

Each item of For for Parks equipment is designed to attach to a central column. Columns are available in Double (2 sided), Triple (3 sided) and Quad (4 sided) options.

The Triple and Quad offer the benefits of increased social interaction as well as greater space efficiency limiting the cost of associated site works.
